EDUCATION

JECRC University

Bachelor of Technology in Computer Science Engineering

Jaipur, Rajasthan

2023 – 2027

PROJECTS

Smart Attendance System <i>Python, OpenCV, MySQL</i>	2025
- Developed a smart attendance system using face recognition technology - Integrated OpenCV for real-time face detection and recognition - Stored attendance records securely using MySQL database - Improved attendance tracking efficiency for educational institutions	
AI Resume Analyzer <i>Python, NLP, Flask</i>	2025
- Built an AI-based resume analyzer to evaluate resumes automatically - Implemented Natural Language Processing for keyword extraction - Generated resume scores and skill recommendations dynamically - Designed backend APIs using Flask framework	
Online Food Ordering Website <i>HTML, CSS, JavaScript, PHP</i>	2024
- Developed a responsive online food ordering platform - Implemented user authentication and order management system - Integrated backend database using PHP and MySQL - Enhanced user experience with interactive UI design	
Weather Forecast Application <i>React.js, API Integration</i>	2025
- Designed a responsive weather application using React.js - Fetches real-time weather data from external APIs - Displays temperature, humidity, and weather conditions dynamically - Implemented responsive UI for desktop and mobile devices	
Expense Tracker System <i>Java, MySQL</i>	2024
- Created an expense tracker application for managing daily expenses - Implemented expense categorization and report generation - Connected application with MySQL database for secure storage - Generated monthly expense summaries and analytics	
Portfolio Website <i>HTML, CSS, JavaScript</i>	2023
- Designed and developed a personal portfolio website - Showcased technical skills, projects, and achievements effectively - Implemented responsive layouts and modern UI design - Optimized website loading speed and accessibility	
Library Management System <i>Python, SQLite, Tkinter</i>	2024
- Developed a library management application for managing books and records - Implemented functionalities for book issue and return operations - Used SQLite database for efficient data handling - Designed GUI using Tkinter for user-friendly interaction	
Typing Speed Tester <i>JavaScript, HTML, CSS</i>	2023
- Created a typing speed tester web application - Calculated typing speed and accuracy in real-time - Implemented timer functionality and text comparison logic - Designed interactive frontend with responsive layout	

Student Result Management System <i>Java, MySQL</i>	2024
• Developed a result management system for storing academic records • Implemented student result calculation and report generation • Used MySQL database for maintaining student details • Improved data management and report accessibility	

Chat Application <i>Node.js, Socket.IO</i>	2025
• Built a real-time chat application using Socket.IO • Implemented instant messaging and multi-user communication • Designed responsive frontend interface for smooth interaction • Enhanced performance for real-time communication	

TECHNICAL SKILLS

Languages: C++, Java, Python, JavaScript, SQL, HTML/CSS
Frameworks & Technologies: React.js, Flask, Node.js, OpenCV, MySQL
Developer Tools: Git, GitHub, VS Code, IntelliJ IDEA, Android Studio
Core Subjects: Data Structures & Algorithms, DBMS, Operating Systems, Computer Networks
Libraries: NumPy, pandas, Matplotlib

ACHIEVEMENTS

Solved 250+ coding problems on coding platforms

Built multiple academic and real-world software projects

Participated in coding competitions and university hackathons

Strong understanding of Data Structures, Algorithms, and DBMS

Actively learning AI, Web Development, and Backend Technologies
